

## SYSTEM AND METHOD FOR RUN-TIME REPORT RESOLUTION OF REPORTS THAT INCLUDE PROMPT OBJECTS

### **ABSTRACT**

A report resolution system that includes prompt objects used to define every aspect of a report and specifically an object-prompt object. To resolve a report with prompt objects, a report instance is created and passed to a resolution server that collects

5 the prompt objects contained therein to create a resolution object that includes the prompt questions from the prompt objects. A report server raises an event to prompt the user to respond to the questions in the resolution object.
